

Wordfast Anywhere – The Most Advanced Web-Based Translation Memory Tool

The #1 provider of platform-independent translation technology invites you to experience Wordfast Anywhere, the world's largest and fastest growing cloud-based Translation Memory application. With over a decade of experience providing the most affordable and powerful TM technology for any platform, Wordfast offers users all the benefits they have come to expect from Wordfast products, now in a completely online translation environment.

FREEDOM TO TRANSLATE FROM ANYWHERE

Wordfast Anywhere is designed to free translators from their desktops. Translators can now use Wordfast to work on projects from anywhere they have a web-browser—whether on their own computer, in an internet cafe, or even from a handheld device.

IMMEDIATE DEPLOYMENT

With Wordfast Anywhere, there is no need to download or install any software. Simply deploy Wordfast Anywhere from your web-browser and begin translating within minutes. You'll never wonder whether you are running the most current version. Wordfast Anywhere is always up-to-date, eliminating the hassle of upgrading.

INSTANT COLLABORATION

Wordfast Anywhere enables translators to invite their colleagues to share TMs and glossaries in real-time in a password-protected workspace on a centralized server.

WORKFLOW OPTIMIZATION

Since Wordfast Anywhere stores TM assets and project files on a centralized server, there is less need for file manipulation and transfer.

COMPLETE PRIVACY AND CONFIDENTIALITY

Wordfast Anywhere provides complete and permanent confidentiality of all source content, target content, and Translation Memory assets. Your data is never shared nor disclosed to any third party unless you specifically invite them.

REDUCE IT COSTS

Wordfast hosts your data in a secure workspace on Wordfast's server. This means you have no IT infrastructure to manage or maintain. Your data is backed up so storage is safe and resilient.

ACCESS TO ADDITIONAL RESOURCES

Wordfast Anywhere offers users the option to leverage from Machine Translations (via Google Translate) or access the VLTM, a set of large TMs donated by the Wordfast community. Wordfast Anywhere also supports alignment of existing source and target content in certain languages so that a TM can be created from parallel text.

EASE OF USE

Like all Wordfast products, Wordfast Anywhere boasts an intuitive, user-friendly interface, so translators experience an accelerated learning curve and can begin working on translation projects with very little self-training.

FREE OF CHARGE

Best of all, Wordfast Anywhere is currently free of charge for all translators, regardless of whether they have a Wordfast license. Simply log on at www.FreeTM.com and begin translating. (Extended features may be introduced in the future and accessible with a paid subscription.)
